

OIC Resilient Batch Processing

This asset contains accelerator type OIC Gen3 implementation of the resilient batch processing on top of Parking Lot Pattern. This pattern address one specific need when using Oracle Integration Cloud OIC for processing many batches. The repository provides the OIC Gen3 project with sample integrations and ATP scripts required for the implementation described in the [README.md](#).

Review Date: 04.04.2025

When to use this asset?

Use this asset as an example respectively as the template for the resilient batch services solution. It is good to update the model based on implemented business, capabilities of the target systems and operational and monitoring requirements.

How to use this asset?

This asset is provided as the resilient batch processing solution template.
Follow the instructions in the [README.md](#).
