# Safe harbor statement

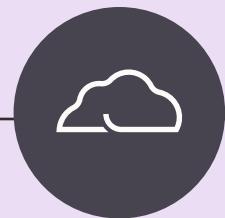

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

# Content management is essential across every organization...

# Intelligent content management across the enterprise

Oracle Content Management product strategy

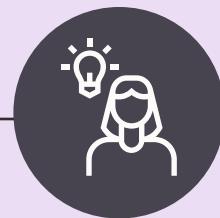

## Unified Platform

Offer a common set of capabilities across all content types and channels. Support key DAM, DXP, headless, content services, and collaboration use cases from a single, modern SaaS solution

## Composable & Connected Content

Compose any headless experience. Connect content to any business application or experience across CX, ERP, HCM, and more. Put content where it needs to be

## Intelligent Guidance

Remove barriers to adoption with AI/ML and intuitive user experiences accessible from web, mobile, desktop, and native apps.

## Packaged Apps & Samples

Speed time-to-market and improve ROI with ready-to-go, quickly enabled, fully supported Apps (e.g., Sales Accelerator, Email Builder).

# Digital Asset Management

## Integrated with Adobe Creative Cloud

Ensure zero disruption to your existing workstream with native integration with Adobe Photoshop, Premiere Pro, InDesign, and other Creative Cloud apps.

## Smart Tagging

Automatically tag assets as they are ingested.

## Automatic Renditions

Remove the need to create derivative assets manually by creating policies for what renditions are created and when.

## Multi-channel Publishing

Decide when and where assets can be published. Set expiration dates on asset availability.

## CDN Cache and Video Streaming

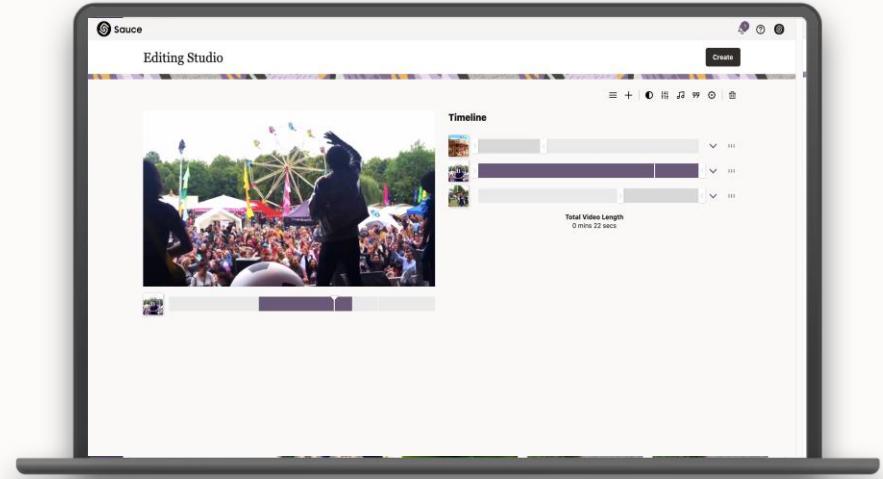

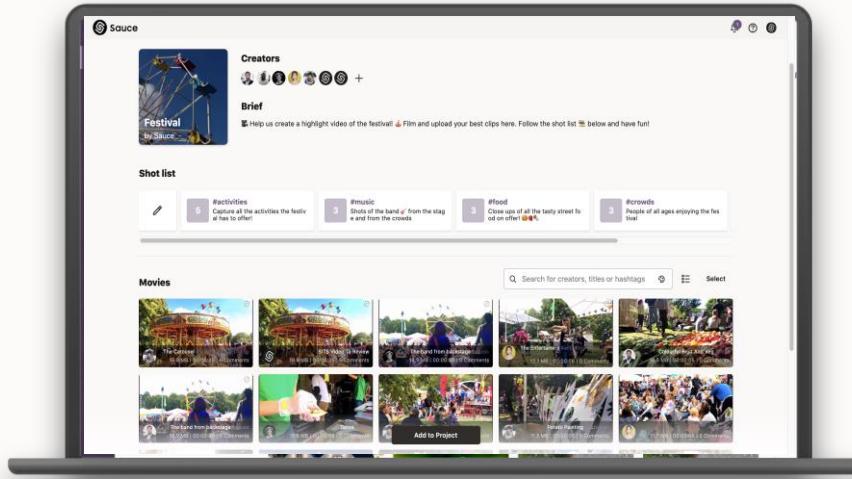

Optimize delivery through preconfigured CDN and streaming services.

# Oracle Video Creation Platform (Sauce)

A cloud based video creation platform

The Video Creation Platform for Teams!

**1. Create a Project and Invite Creators to Upload Videos & Photos**

**2. Collect, review and curate videos in one place**

**3. Edit and share videos**

# Digital Experience Platform (DXP)

## Drag-and-Drop Creation

Create new sites and pages quickly with zero IT dependence using in-line WYSIWYG editing.

## Comprehensive Governance

Ensure experiences are secure, on-brand, and compliant for any site, internal or external.

## Open Frameworks

Develop templates and components using any JavaScript framework.

## Automatic Scaling

Deal with growth and seasonal peaks with auto-scaling global data centers.

# Sites in Oracle Content Management

---

**GUIDED TOUR**

The screenshot shows the Oracle Content Management interface. On the left, a sidebar lists various navigation items: Home, Assets, Sites, Experiences, Recommendations, Developer, Analytics, Collaborations, Documents, Conversations, Integrations, Content, and Capture. The main area is titled "Content Management" and "Experiences". A modal window titled "Properties for Experience 'React Mobile App'" is open, specifically the "Outgoing" tab. The modal header includes "Close" and "Apply" buttons. Below the tabs are sections for "Outgoing Targets", "Incoming", "Analyze", and "Events". The "Outgoing Targets" section contains a sub-section for "Custom Target". It includes fields for "Name" (Required), "Method" (set to "POST"), "URL Endpoint" (Required), and a "Test" button. There are three tabs: "Content" (selected), "Headers", and "Body". Below these tabs is a note: "Trigger target for content changes in selected repositories or content publishes in selected channels." Two radio buttons are present: "Changes" (selected) and "Publishes". A "Repositories" section with a dropdown menu labeled "Select one or more repositories" is shown. At the bottom of the modal is an "Add Target" button.

# Headless Content Management

## Popular Frameworks

Start quickly with samples & tutorials using React, Vue, Gatsby, Next.JS, Svelte, Angular, and more.

## Modern APIs with GraphQL

Optimize content delivery by retrieving only the required content in a single request.

## In Context Headless Preview

Preview content changes across any headless experience directly from Oracle Content Management.

## Experience Orchestration

Enable marketers and headless developers to work independently without bottlenecks.

The screenshot displays the Oracle Content Management interface. On the left, a sidebar lists various content items like 'Rule of Threes' and 'Headline'. The main area shows a content editor for 'Rule of Threes v1'. It includes sections for 'Headline' (18 of 200 characters, 'The Rule of Threes'), 'Sub Headline' (79 of 500 characters, 'Learn a common trick professional designers use can be employed in any setting'), 'Hero Images and Videos' (with a placeholder for 'shutterstock\_376829140.jpg'), and 'Main Content' (with rich text editor tools and three paragraphs about the rule). Below the main content is a 'Featured Text or Quotes' section with a text input field. At the top right are buttons for 'Publish', 'Submit for Review', 'Cancel', 'Save', and 'Done'. A 'Conversation' panel on the right shows a message from 'Bob Meixner' asking 'What additional videos should we include?'.

# Content Management

## Flexible Content Modeling

Manage any type of structured content with configurable content types and attributes.

## Smart Authoring Experience

Prescribe digital assets to content creators as they create content. Streamline authoring with custom forms, editors, and real-time previews across channels.

## Smart Categorization & Recommendations

Categorize content across taxonomies automatically and create rules to recommend content across experiences

## Complete Auditing and Dependency Tracking

Track relationships between content items, see what's changed between versions, and tap into usage metrics.

## Collaboration &amp; Document Management

## Integrated with Office 365

Edit documents in Microsoft Office 365 in real-time with other users.

## Version Control and Auditing

Automatically version assets, rollback, and track who has viewed, edited, and downloaded content.

## Offline and Mobile Access

Sync specific folders or files to your desktop for offline access and use native iOS and Android apps for mobile access.

## Secure Sharing

Share content using secure links with optional or mandatory expiration dates and passcodes.

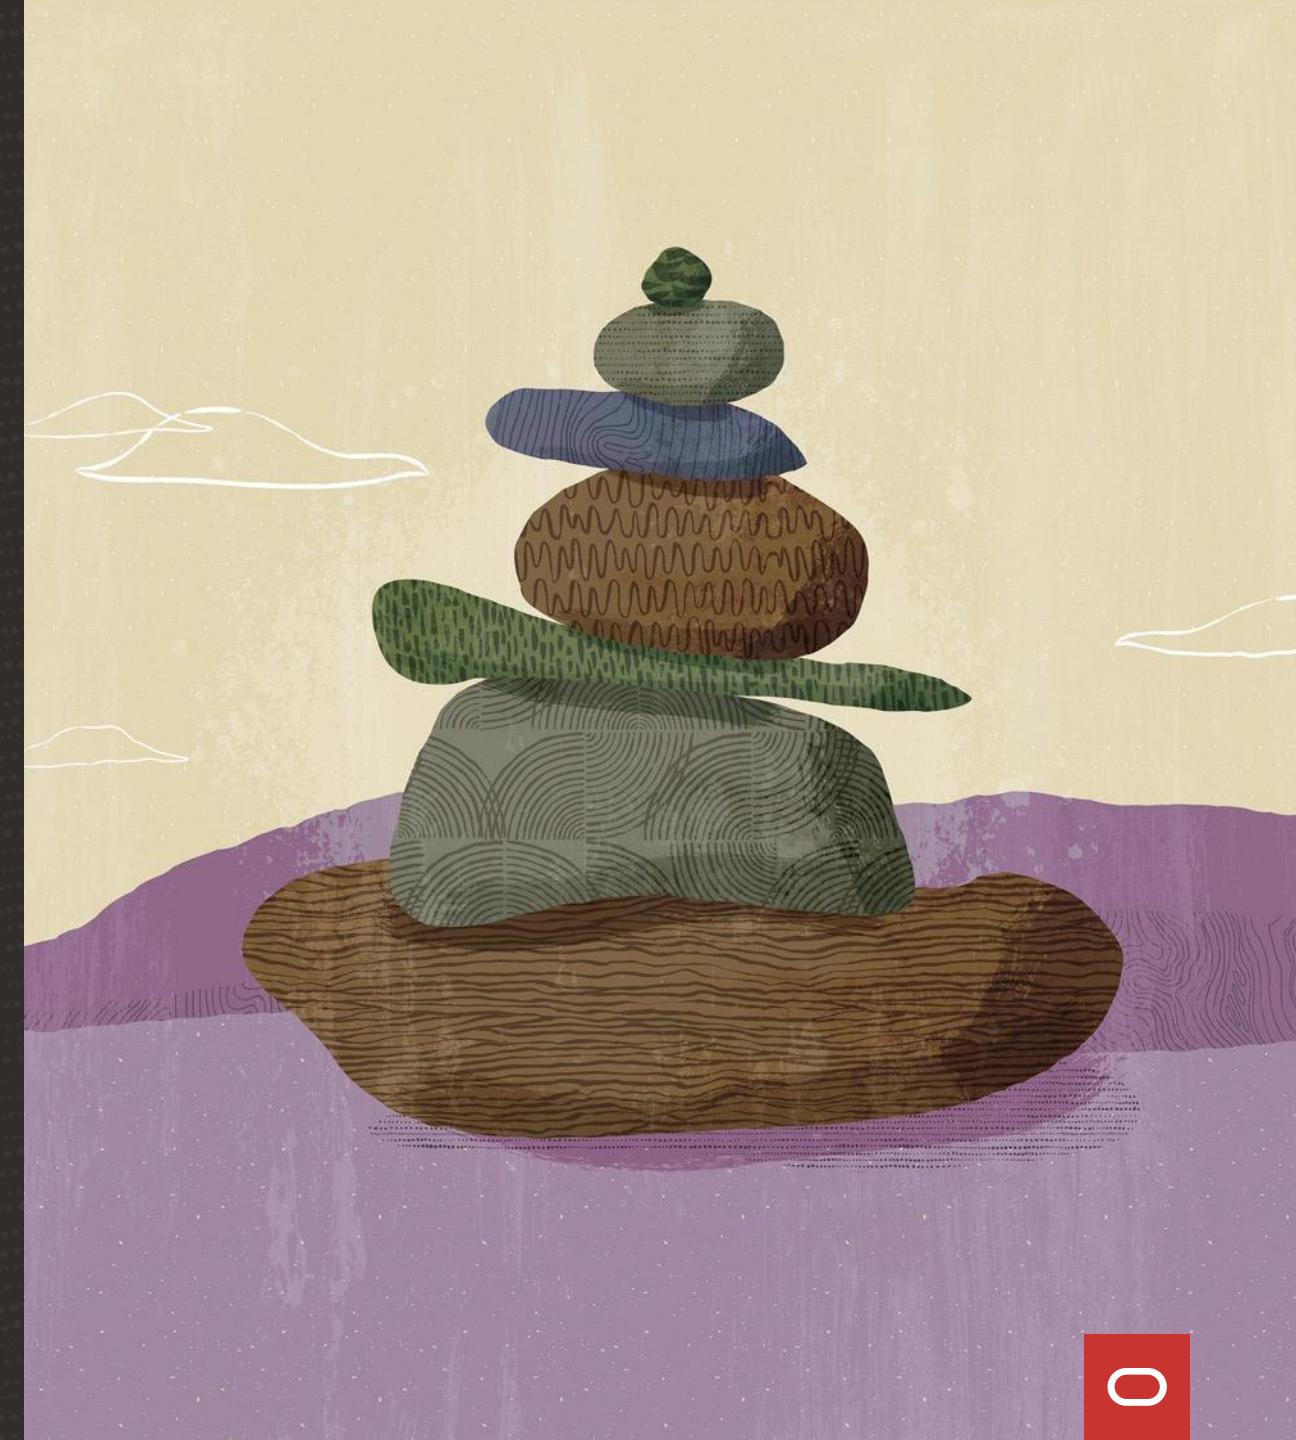

# WHAT IS A CONTENT SERVICES PLATFORM (CSP)?

---

**Enterprise Content Management (ECM)** is a set of processes and tools to capture and manage content, as well as store, preserve and deliver content securely and effectively.

Content Services Platforms (CSP) extends ECM platforms with standard features like Intelligent **capture and workflow** as well as more **seamless integration** and extensibility options, typically driven by Cloud.

CSP solutions help customers eliminate legacy ECM content silos to increase agility and efficiency. They also improve governance and compliance, from HIPAA to GDPR.

# Oracle Content Management

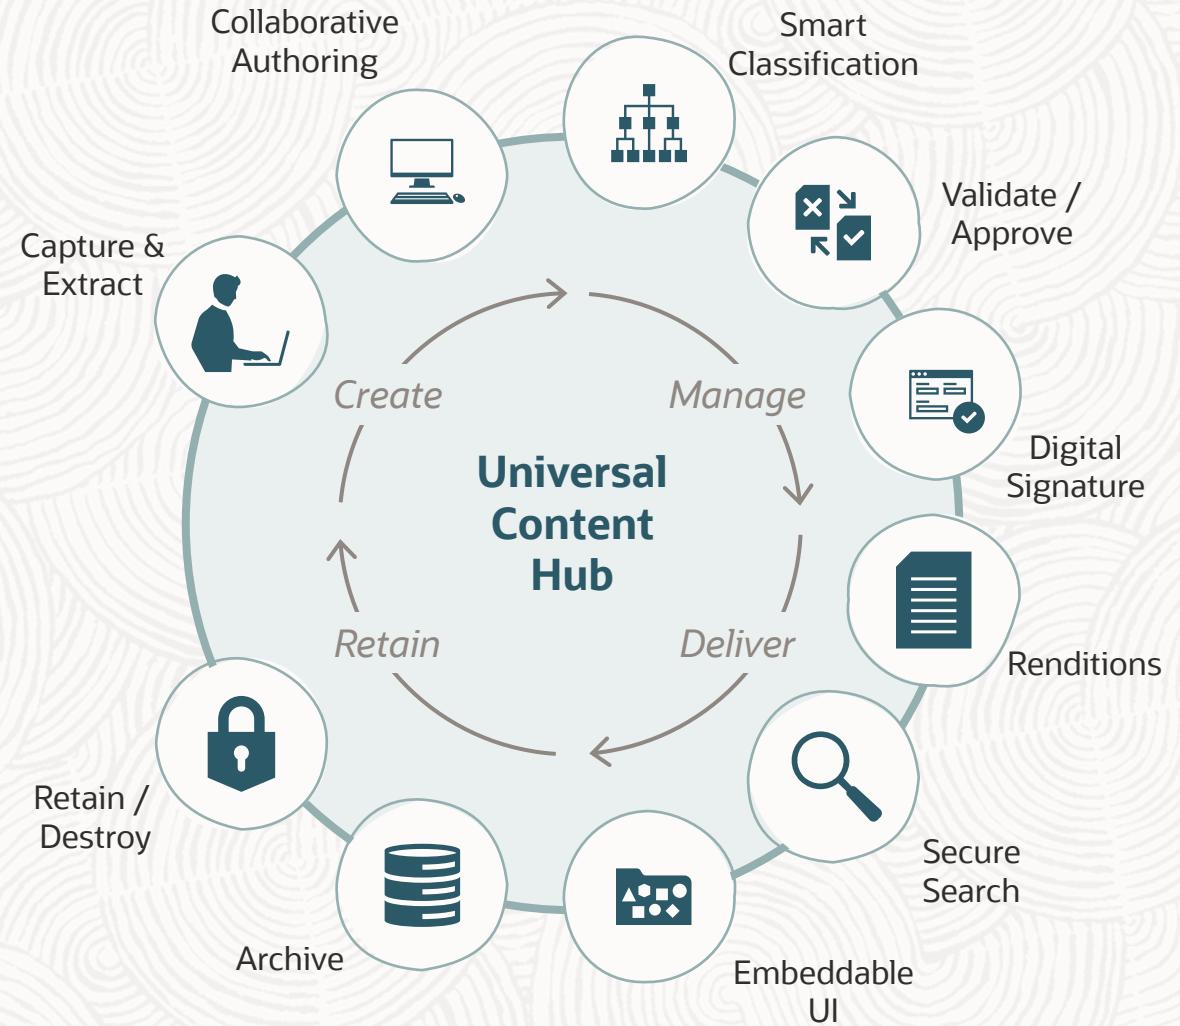

## Content Services Platform

Manage entire **content lifecycle** from capture and extraction to archival and retention

**Extend the platform** by leveraging partner and Oracle components...or build your own in Oracle Cloud

Quickly **integrate with Oracle apps** or with any 3rd party application via embeddable components or secure APIs

True **cloud-native architecture** of OCM guarantees scalability, availability and automatic upgrades with zero downtime.

# Oracle Content Management

A unified, cloud native, integrated content services platform

## Built on OCI

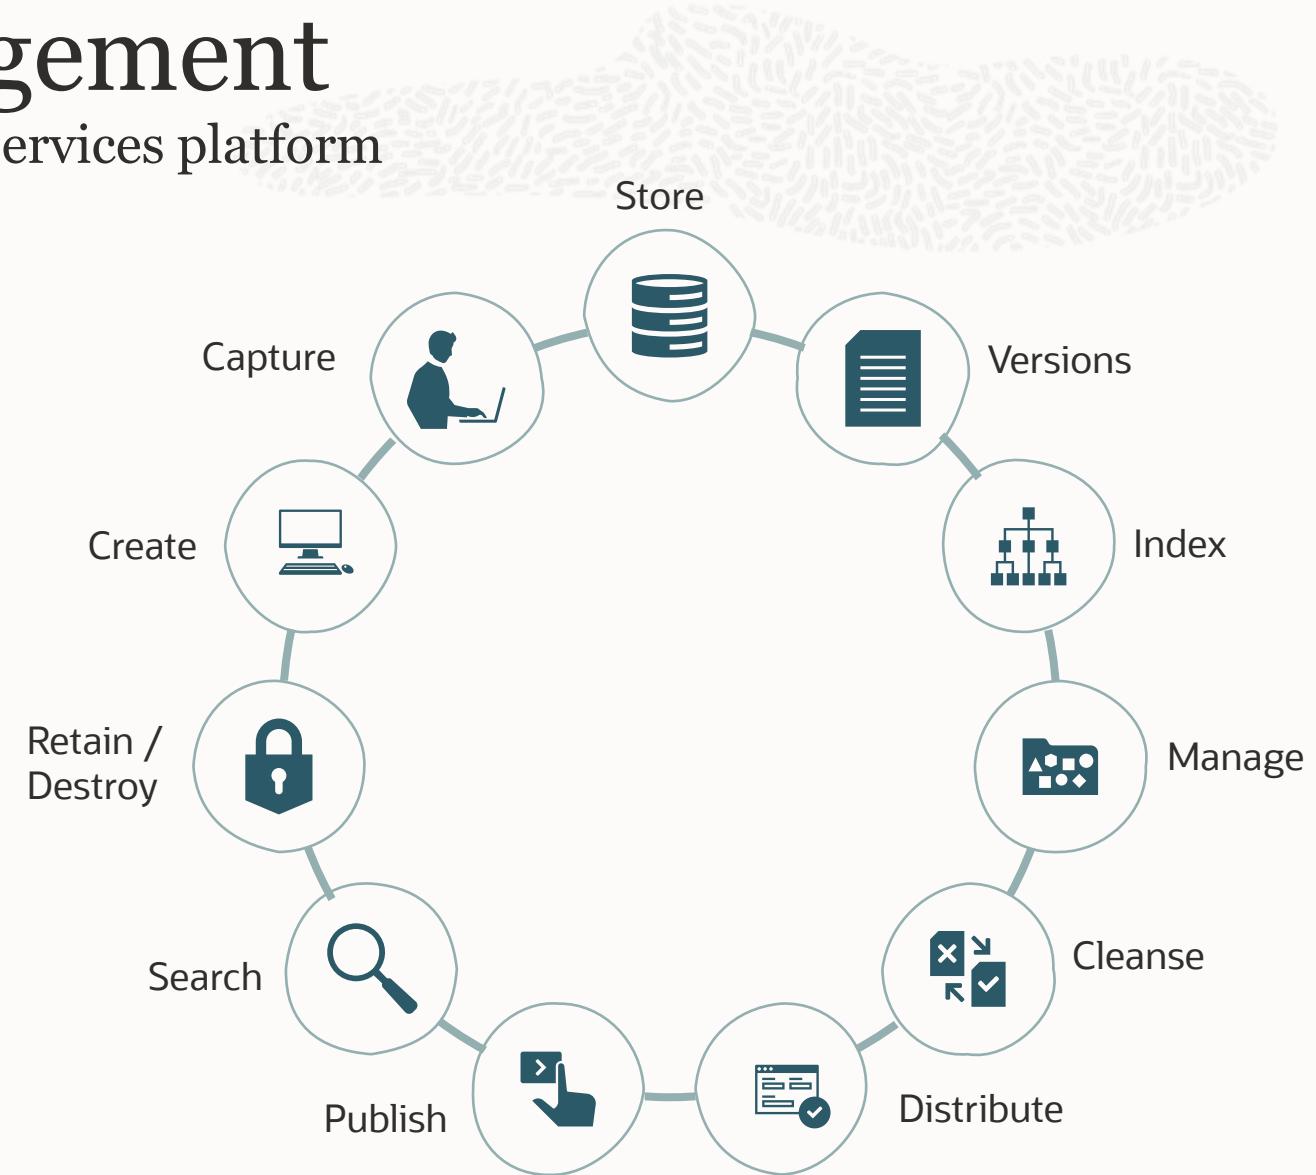

- Zero ops install, scale-out, monitor
- ZDT upgrades every 2 weeks
- Advanced Hosting Options

## Enterprise Features

- Manage complete document lifecycle
- Extreme scalability with granular security
- Built-in AI/ML for organization, findability

## Flexible Integration Options

- API-first design with enterprise security
- Widgets for upload, search, preview
- Oracle and 3<sup>rd</sup> party integrations available

## MANUFACTURING AND SUPPLY AGREEMENT

This Manufacturing and Supply Agreement (this "Agreement") is made as of the 25 day of May, 2013 (the "Effective Date") by and between:

Supplier: Tyrell Corp. ("Supplier"), located at 3643 Sundown Ln, Murfreesboro, Montana 15020 [Address] and

Buyer: Supremo Engineering ("Buyer"), located at 1878 East Main St., Suite 200 New York, NY 10017 [Address].

Manufacturing under this Agreement will take place at 1 Fair Ln Dr, Dearborn, MI 48128 [Address] (the "Manufacturing Plant").

1. Supply of Products. Supplier shall manufacture and supply to Buyer Construction materials and components for commercial office space (the "Products") in accordance with the following specifications (the "SOW"): The project, heretofore known as the "Office Building", located at 1 Orchard Rd, Armonk, NY 10504 will require full furnishing of relevant materials and components to complete the construction of a 6 story building housing 500 offices, 25 conference rooms, executive suites, fitness center, cafeteria plus corresponding standard facilities.

Buyer will make all reasonable efforts to provide clear instructions, documentation, and product specifications to Supplier.

**Additional Orders (Check one)**

Buyer may submit additional orders under this Agreement. Buyer shall submit orders for the Products by submitting a purchase order to Supplier (the "Purchase Order") detailing the number of units of the

## EMBED CONTENT IN APPLICATIONS

### Easily surface content inside any enterprise application

**REST APIs.** Extensive set of secure APIs allow developers to search the repository or create new documents programmatically.

**UI Widgets.** Configurable visual components allow developers to quickly embed content into any application.

**App Integrations.** Preintegrated with many Oracle CX services, including Sales, Service, Commerce, Marketing, HCM, ERP, etc.

# Analytics in Oracle Content Management

**GUIDED TOUR**

# Oracle Content Management

## The Cloud-native CMS from Oracle

- 100% Oracle-managed, multi-tenant service running on OCI Gen2 in every geography
- Highly Available Architecture offers more than 99% availability by default in a single region
- Integrated firewall and load balancer to provide automatic failover within a region
- Backup and restore leverages underlying capabilities of OCI – ATP, Object Storage, etc.
- Service instrumented to automate monitoring and alerts, 24x7 OPS coverage.
- Monthly upgrades are applied with ZDT process by Oracle.
- Federated Identity & Access Mgmt makes it easy to extend to customer's security services and integrate within larger business processes

# Why Oracle Content Management

# 1. Built Cloud-Native from the Start

100% SaaS Deployments across 41 Cloud Regions in 22 Countries

## New Updates Released Every 2 Weeks

Zero downtime updates, zero operations. Uptake new features immediately.

## Provision New Instances in Minutes

Get up and running quickly. Test new configurations.

## Modern APIs

Integrate and extend using an API-first platform with support for GraphQL and REST.

## Native Disaster Recovery

Full application recovery without the need for special skills or operations.

The screenshot shows a web browser window with the Oracle Help Center interface. The title bar includes the Oracle logo, a menu icon, and the text "Help Center". A search bar at the top right contains the query "What's New for Oracle Content Manag...". Below the header, the breadcrumb navigation shows "Cloud / Cloud Platform / Oracle Content Management". The main content area has a dark blue header with the white text "What's New for Oracle Content Management". On the left, there's a sidebar with icons for Home, Assets, Sites, Experiences, Recommendations, Developers, Analytics, Collaborations, Documents, Conversations, and Source Video. It also includes sections for "Table of Contents", "What's New in Oracle Content Management", and "Documentation Accessibility". The main content area starts with a section titled "What's New in Oracle Content Management" dated "23.4.1 — April 2023". This section lists "General Improvements" such as Arabic translation and floating magnification controls, and "Sites Improvements" like the Activity tab. To the right of the main content, there's a screenshot of the Oracle Content Management user interface showing site properties and activity logs. A large orange "Like" button is visible in the bottom right corner of the screenshot area.

## 2. Designed as a Unified Platform

Support Multiple Use Cases with a Single Solution

### Manage all types of content Universal Asset Hub

Capture, create, curate, design, approve, deliver, track, and archive with the Universal Asset Hub.

### Reduce Silos and Total Cost of Ownership

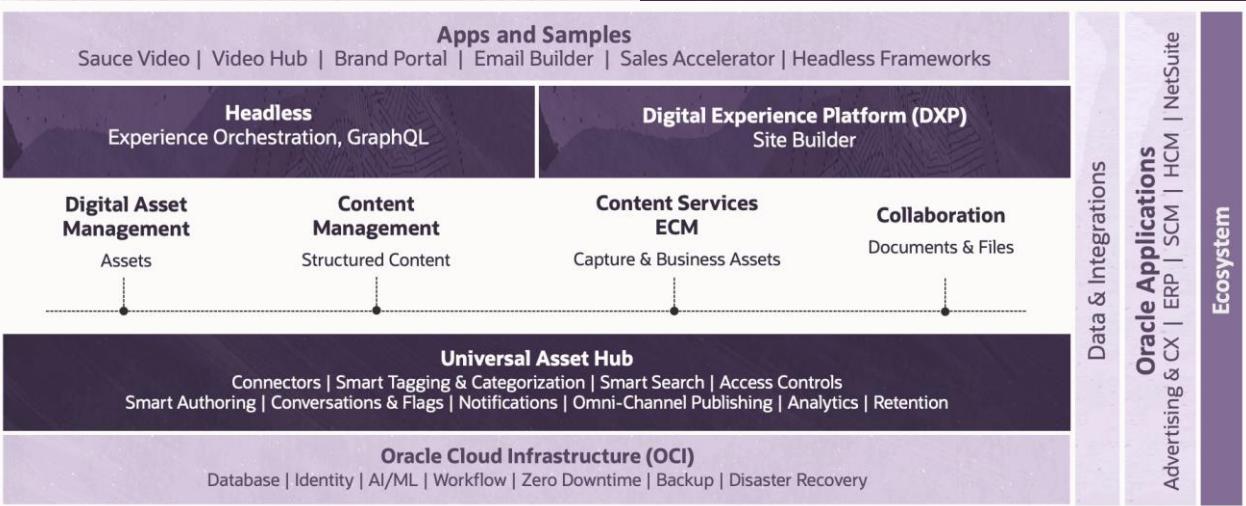

Eliminate point solutions and legacy content systems with one modern platform.

### Start Small and Grow

Solve content problems quickly using native capabilities or apps, expand to other use cases with lower effort.

### Take Advantage of Large Oracle Ecosystem

Manage content for other Oracle apps consistently across the enterprise.

# 3. Supports Hybrid Experiences

Deploy any combination of sites or headless experiences

## Give practitioners intuitive tools

Build experiences quickly with drag-and-drop, in-line editing, reusable components, and templates to support consistency

## Remove constraints on developers

Develop experiences using any framework, deliver headless content using GraphQL.

## Mix and match architectural approaches

Deliver some portions of an experience using Site Builder while others leverage headless frameworks.

The screenshot displays two main components of the Oracle Site Builder interface. On the left, a component library titled 'Seeded' is shown, containing various UI components like Title, Paragraph, Text, Button, and Structure. On the right, a preview of a blog post titled 'Power of Coffee #2' is displayed, featuring a header image of coffee cups, a date ('March 16, 2022'), and a sub-header ('Giving back to the community'). Below the preview, a content list shows three more blog posts under the 'DRINKS' category. At the bottom, a GraphQL query editor window is open, showing a complex query with multiple fragments and variables. The query is used to fetch blog posts, including fields like 'id', 'blogContent', and 'blogCategory'. The right side of the interface also includes a schema browser and a query history panel.

## 4. Embeddable and Composable

Add content functionality to any application with native embeddable UI

### Put content where people work

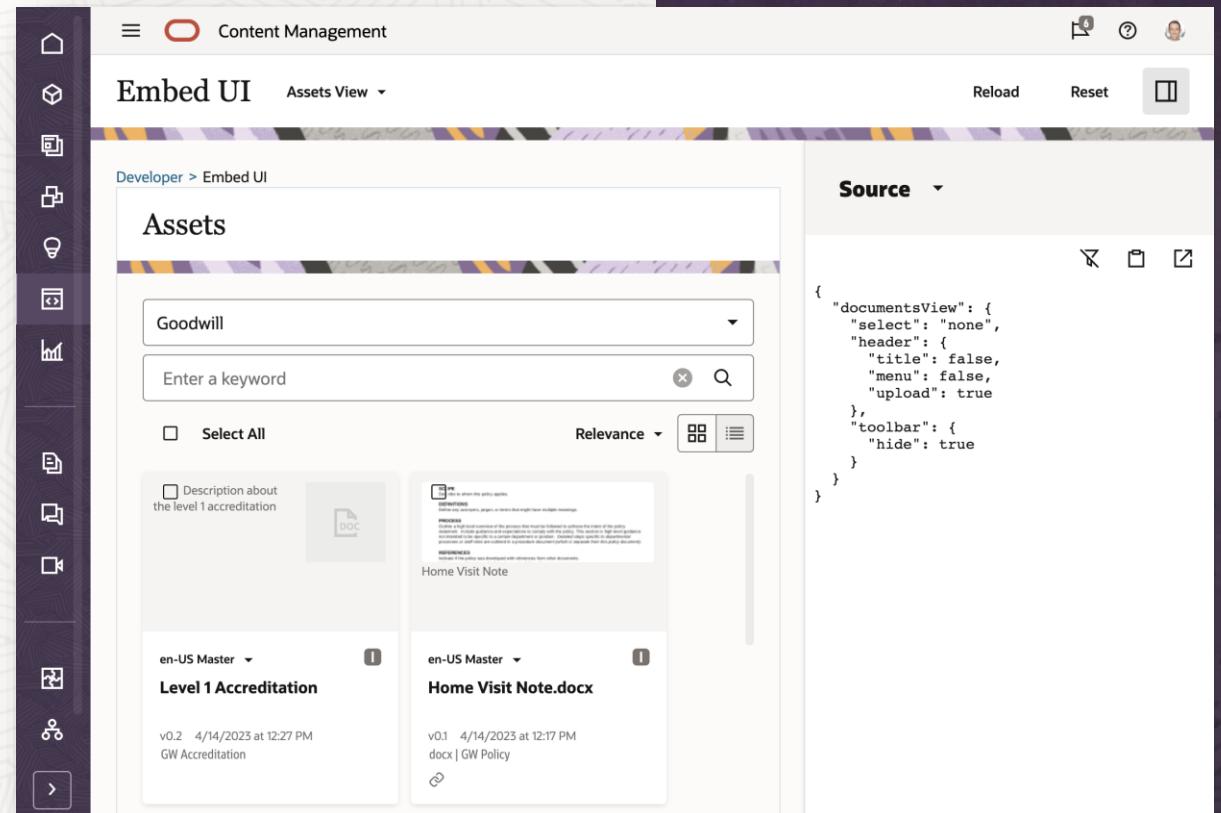

Expose content and the Oracle Content Management UI in any app using standard JavaScript.

### Reduce development effort

Embeddable UI JavaScript is generated automatically based on capabilities you choose to enable for your use case.

### Develop using the same tools as Oracle

Use a well-documented, consistent, supported framework and tools leveraged by Oracle and our partners to build integrations to other Oracle and third-party products.

# 5. Applications Platform

Purpose-built apps to solve content-related business problems

## Speed Time-to-Market

Install apps in a few clicks, configure, and use.

## Improve ROI

Get more from a single content platform used across multiple use cases and reduce point solutions

## Tap into an Innovative Ecosystem

Leverage apps from Oracle, partners, or build your own.

### Apps include:

- Sales Accelerator: sales enablement portal
- Email Builder: drag and drop email designer for marketers
- Video Hub: video delivery site
- Asset Activity Timeline: details audit log visualizer
- Type Visualization: content modeling visualizer
- Brand Portal: digital asset management delivery site
- Demo Hub: personalized sales videos for prospects

The screenshot shows the Oracle Content Management Applications interface. On the left, a sidebar lists categories: Sites, Experiences, Recommendations, Developer, Analytics, Collaboration (Documents, Conversations, Sauce Video), Administration (System, Integrations, Content, Capture), and Applications (selected). The main area is titled 'Content Management' and 'Applications'. It displays three cards under the 'Discover' tab: 'Asset Activity Timeline' (Icon: hand holding a device, Description: Asset Activity Timeline Application provides easy way to skim through all activi..., Published By Oracle, View Activities), 'Email Builder' (Icon: envelope, Description: The E-mail Builder application is an easy to use drag and drop interface for ma..., Published By Oracle, View Activities), and 'Type Visualization' (Icon: gear, Description: Type Visualization Application allows users to select content types, and visuali..., Published By Oracle, View Activities). Below these cards is another card for 'Video Hub' (Icon: camera, Description: The Video Hub application allows users to instantly create a hub for video asset..., Published By Oracle, View Activities).

## 6. Flexible Pricing Model

Simple asset-based licensing metric

### Deploy based on business need

No restrictions on number of users, sites, headless experiences, or API calls.

### Flexible contract terms

Pay as you go based on usage, or lock in pricing with an annual contract.

### Get started for free

Use Oracle Content Management Starter Edition for free with limited functionality. Ideal for POCs or small projects.

# 7. Platform Vision

Consistent execution since day one

## Unique market offering

No other vendor provides a platform to support all use cases.

## Everything works together

All functionality on a unified platform provides consistency for our customers and streamlines our development.

## Grounded in experience

Oracle Content Management product leadership has been focused on content management for over two decades.
