

Request for Quotation (RFQ)

Issued by: Supremo Green Revolution (SGR)

Date of Issue: September 2025

1. Introduction

Supremo Green Revolution (SGR) is an African-led non-profit organization dedicated to catalyzing a sustainable transformation of African agriculture through innovation, partnerships, and inclusive growth. SGR supports smallholder farmers, cooperatives, and agribusinesses to build resilience, improve productivity, and strengthen value chains across sub-Saharan Africa.

This Request for Quotation (RFQ) seeks qualified vendors to design, supply, install, and maintain solar-powered irrigation systems for rural smallholder farmers in Kenya, Ghana, and Tanzania. The initiative aims to enhance water security, boost yields, and enable year-round farming through renewable technologies that reduce reliance on fossil fuels and grid power.

The selected vendor will provide a turnkey solution encompassing equipment supply, installation, training, monitoring, and sustainability planning. SGR expects vendors to demonstrate proven experience in comparable agricultural and renewable-energy projects, strong local partnerships, and compliance with international standards.

2. Background and Objectives

SGR's "Solar Irrigation for Smallholders" program is part of its Green Resilience Initiative (GRI) launched in 2025 to address the twin challenges of climate change and rural poverty. The program targets an initial 3,000 farming households across three pilot countries, with plans to scale to 15,000 households over five years.

Specific objectives include:

- Reducing irrigation costs by at least 40% compared to diesel systems.
- Enabling off-season crop cultivation and higher-value production.
- Building local capacity for maintenance and operation.
- Ensuring environmental sustainability through renewable energy adoption.
- Strengthening gender inclusion and community ownership.

3. Scope of Work

The vendor's responsibilities include, but are not limited to, the following:

3.1 System Design and Engineering

- Conduct site assessments and feasibility studies in target regions.
- Design scalable solar irrigation systems tailored to local conditions (0.5–5 ha per site).
- Ensure all equipment complies with ISO 9001:2015, ISO 14001:2015, and IEC 62257 standards for renewable energy systems.
- Provide detailed engineering drawings and system specifications.

3.2 Supply and Installation

- Supply all required components: solar panels, pumps, tanks, drip networks, and control systems.

- Use durable, corrosion-resistant materials suitable for tropical climates.
- Complete installation and commissioning in collaboration with local technicians.
- Ensure systems achieve a minimum daily output of 8,000 liters under standard conditions.

3.3 Capacity Building and Training

- Train at least 500 farmers and 30 local technicians per country in system operation, maintenance, and record-keeping.
- Develop comprehensive training materials, including pictorial manuals in English, Swahili, and Twi.
- Conduct refresher sessions within six months of installation.

3.4 Monitoring and Evaluation (M&E;)

- Provide remote performance monitoring tools (preferably GSM-enabled).
- Submit quarterly performance reports covering water usage, uptime, and farmer feedback.
- Participate in joint evaluation missions with SGR.

3.5 After-Sales Service and Warranty

- Offer a minimum 24-month warranty covering parts and labor.
- Maintain a local service presence in each participating country.
- Ensure spare parts availability for at least five years post-installation.

4. Deliverables

1. Detailed project implementation plan and timeline.
2. Supply and installation of solar-powered irrigation systems at all designated pilot sites.
3. Operational manuals, farmer training guides, and maintenance checklists.
4. Sustainability plan outlining cost recovery, cooperative management, and local ownership models.
5. Quarterly reports and final completion documentation.

5. Compliance and Quality Standards

Vendors must adhere to the following standards and certifications:

- ISO 9001:2015 – Quality Management Systems
- ISO 14001:2015 – Environmental Management Systems
- ISO 45001:2018 – Occupational Health and Safety
- IEC 62257 – Off-grid renewable energy system guidelines
- SDG 7 & SDG 13 Alignment – Clean Energy and Climate Action
- Compliance with national electrical and environmental regulations in each country

Non-compliance with any of the above may result in disqualification.

6. Eligibility Criteria

- Legally registered company in good standing.
- Minimum 5 years of relevant experience in solar or irrigation projects.
- Demonstrated track record of at least three comparable installations in Africa.
- Annual turnover exceeding USD 1 million over the past three years.
- Availability of certified engineers and trained technicians.
- Strong financial stability, evidenced by audited accounts (2022–2024).
- Capacity to operate concurrently in multiple countries.

7. Evaluation Criteria

Criteria | Weight (%) | Description

-----|-----|-----

Technical Proposal | 30 | System design, scalability, compliance with ISO standards

Experience and Capacity | 25 | Team qualifications, relevant project history, local partnerships

Cost Effectiveness | 20 | Overall value for money and transparency of quotation

Sustainability & After-sales Support | 15 | Warranty, service plans, community engagement

Innovation and Digital Monitoring | 5 | Remote monitoring, data analytics integration

Delivery Timeline | 5 | Feasibility of project completion schedule

Preference will be given to vendors proposing innovative, data-driven solutions and demonstrable social impact.

8. Submission Guidelines

All quotations must be submitted electronically in PDF format to procurement@sgr.org by October 10, 2025, with the subject line:

“RFQ – Solar-Powered Irrigation Systems 2025”

Submissions must include:

- Company profile and registration documents
- Detailed technical and financial proposals
- Certificates of compliance with ISO and IEC standards
- Evidence of similar completed projects (including client contacts)
- Sustainability and after-sales plan
- Signed declaration of non-conflict of interest

Late submissions will not be considered.

9. Terms and Conditions

- Quotations must remain valid for 90 days from the submission deadline.
- SGR reserves the right to accept or reject any proposal, in whole or in part, without obligation.
- SGR will not be liable for any costs incurred during the preparation of proposals.
- The successful vendor must sign a formal agreement within 15 days of notification.
- Payment terms will be milestone-based, subject to satisfactory performance verification.

10. Contact Information

All questions or requests for clarification must be submitted in writing to procurement@sgr.org by September 25, 2025.
